

OneScreen™

OneScreen for Business

Work is a process, not a place.

Work is happening everywhere, all around you in real time. There's no time for miscommunication.

Collaboration technology is the key to aligning your team around top priority tasks, and acting instantly on changes in the market with maximum flexibility.

OneScreen. That means all the interactive hardware and software you need in a single device. Put streaming video, people, data and all of your essential business tools at your fingertips, literally. Assemble the team, present the facts, white board your solutions, share your screen and win the business.

All-in-One Solution

Collaborate with video, voice & data, interactive white boarding, screen sharing, annotating, polling, recording, saving, remote management & more.

Easy to Use

Like your computer with an extra large touch screen, so it's familiar for highly technical teams or not so savvy users. Everyone can walk up & work.

Ultra-Compatible

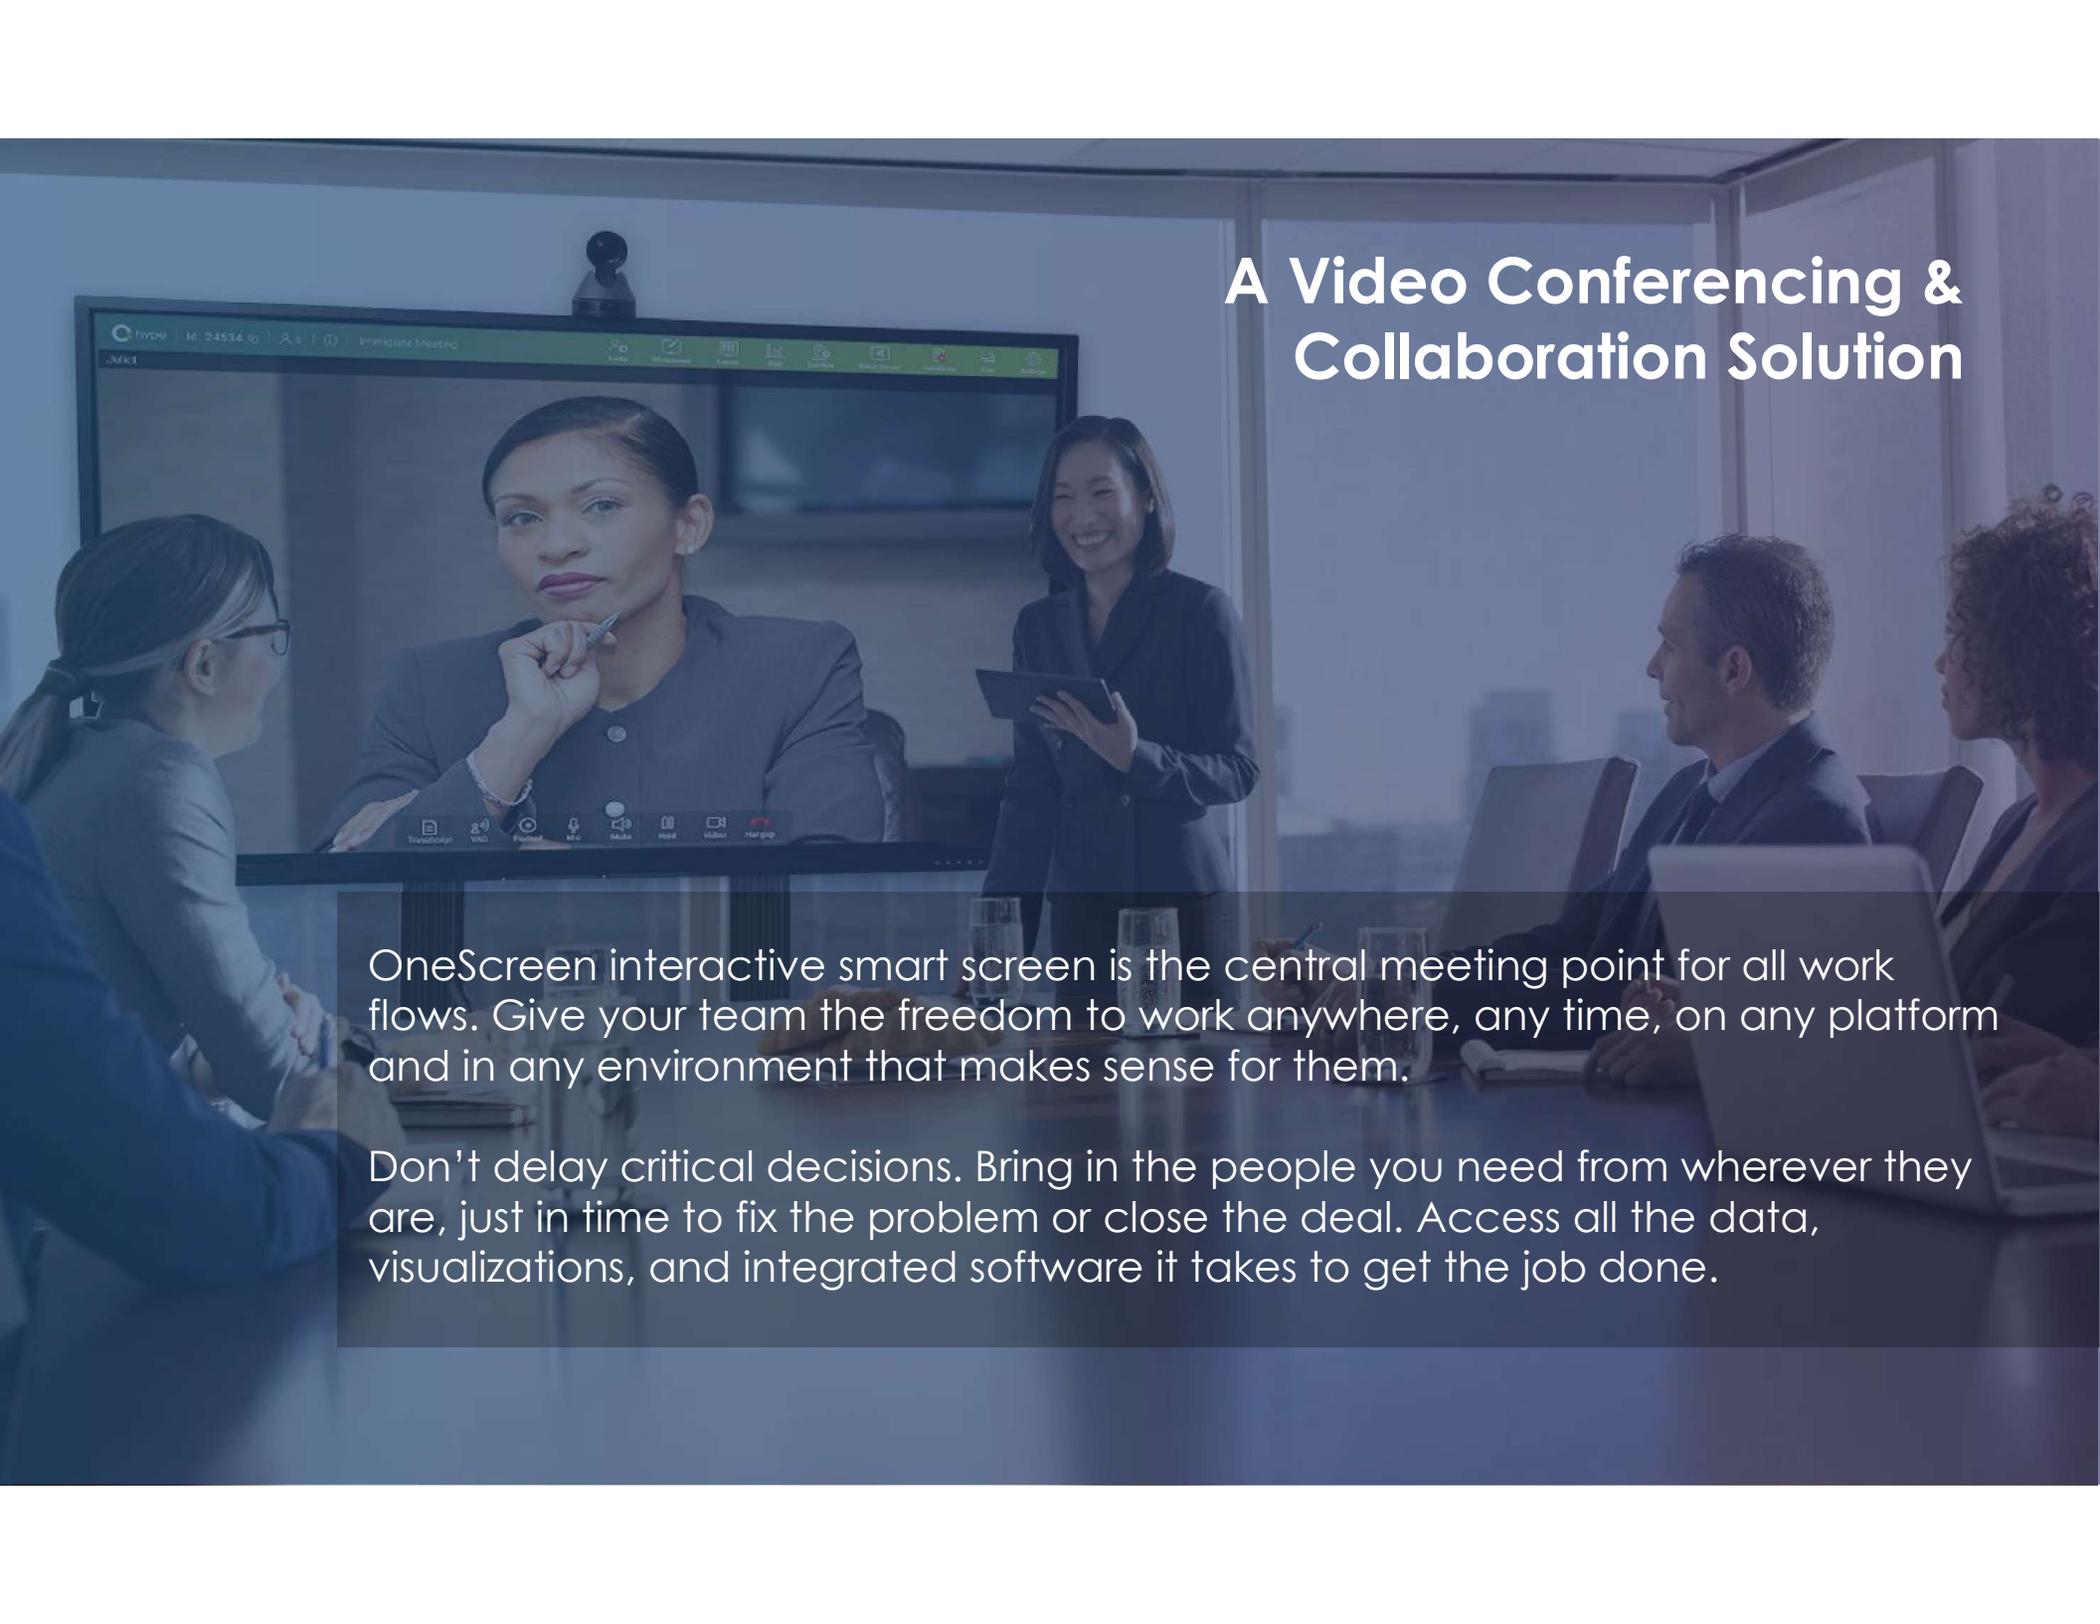

Built to integrate easily into your existing collaboration tech portfolio from hardware to software. Includes Windows, Mac, Android, iOS & Chrome OS.

Support-Centric

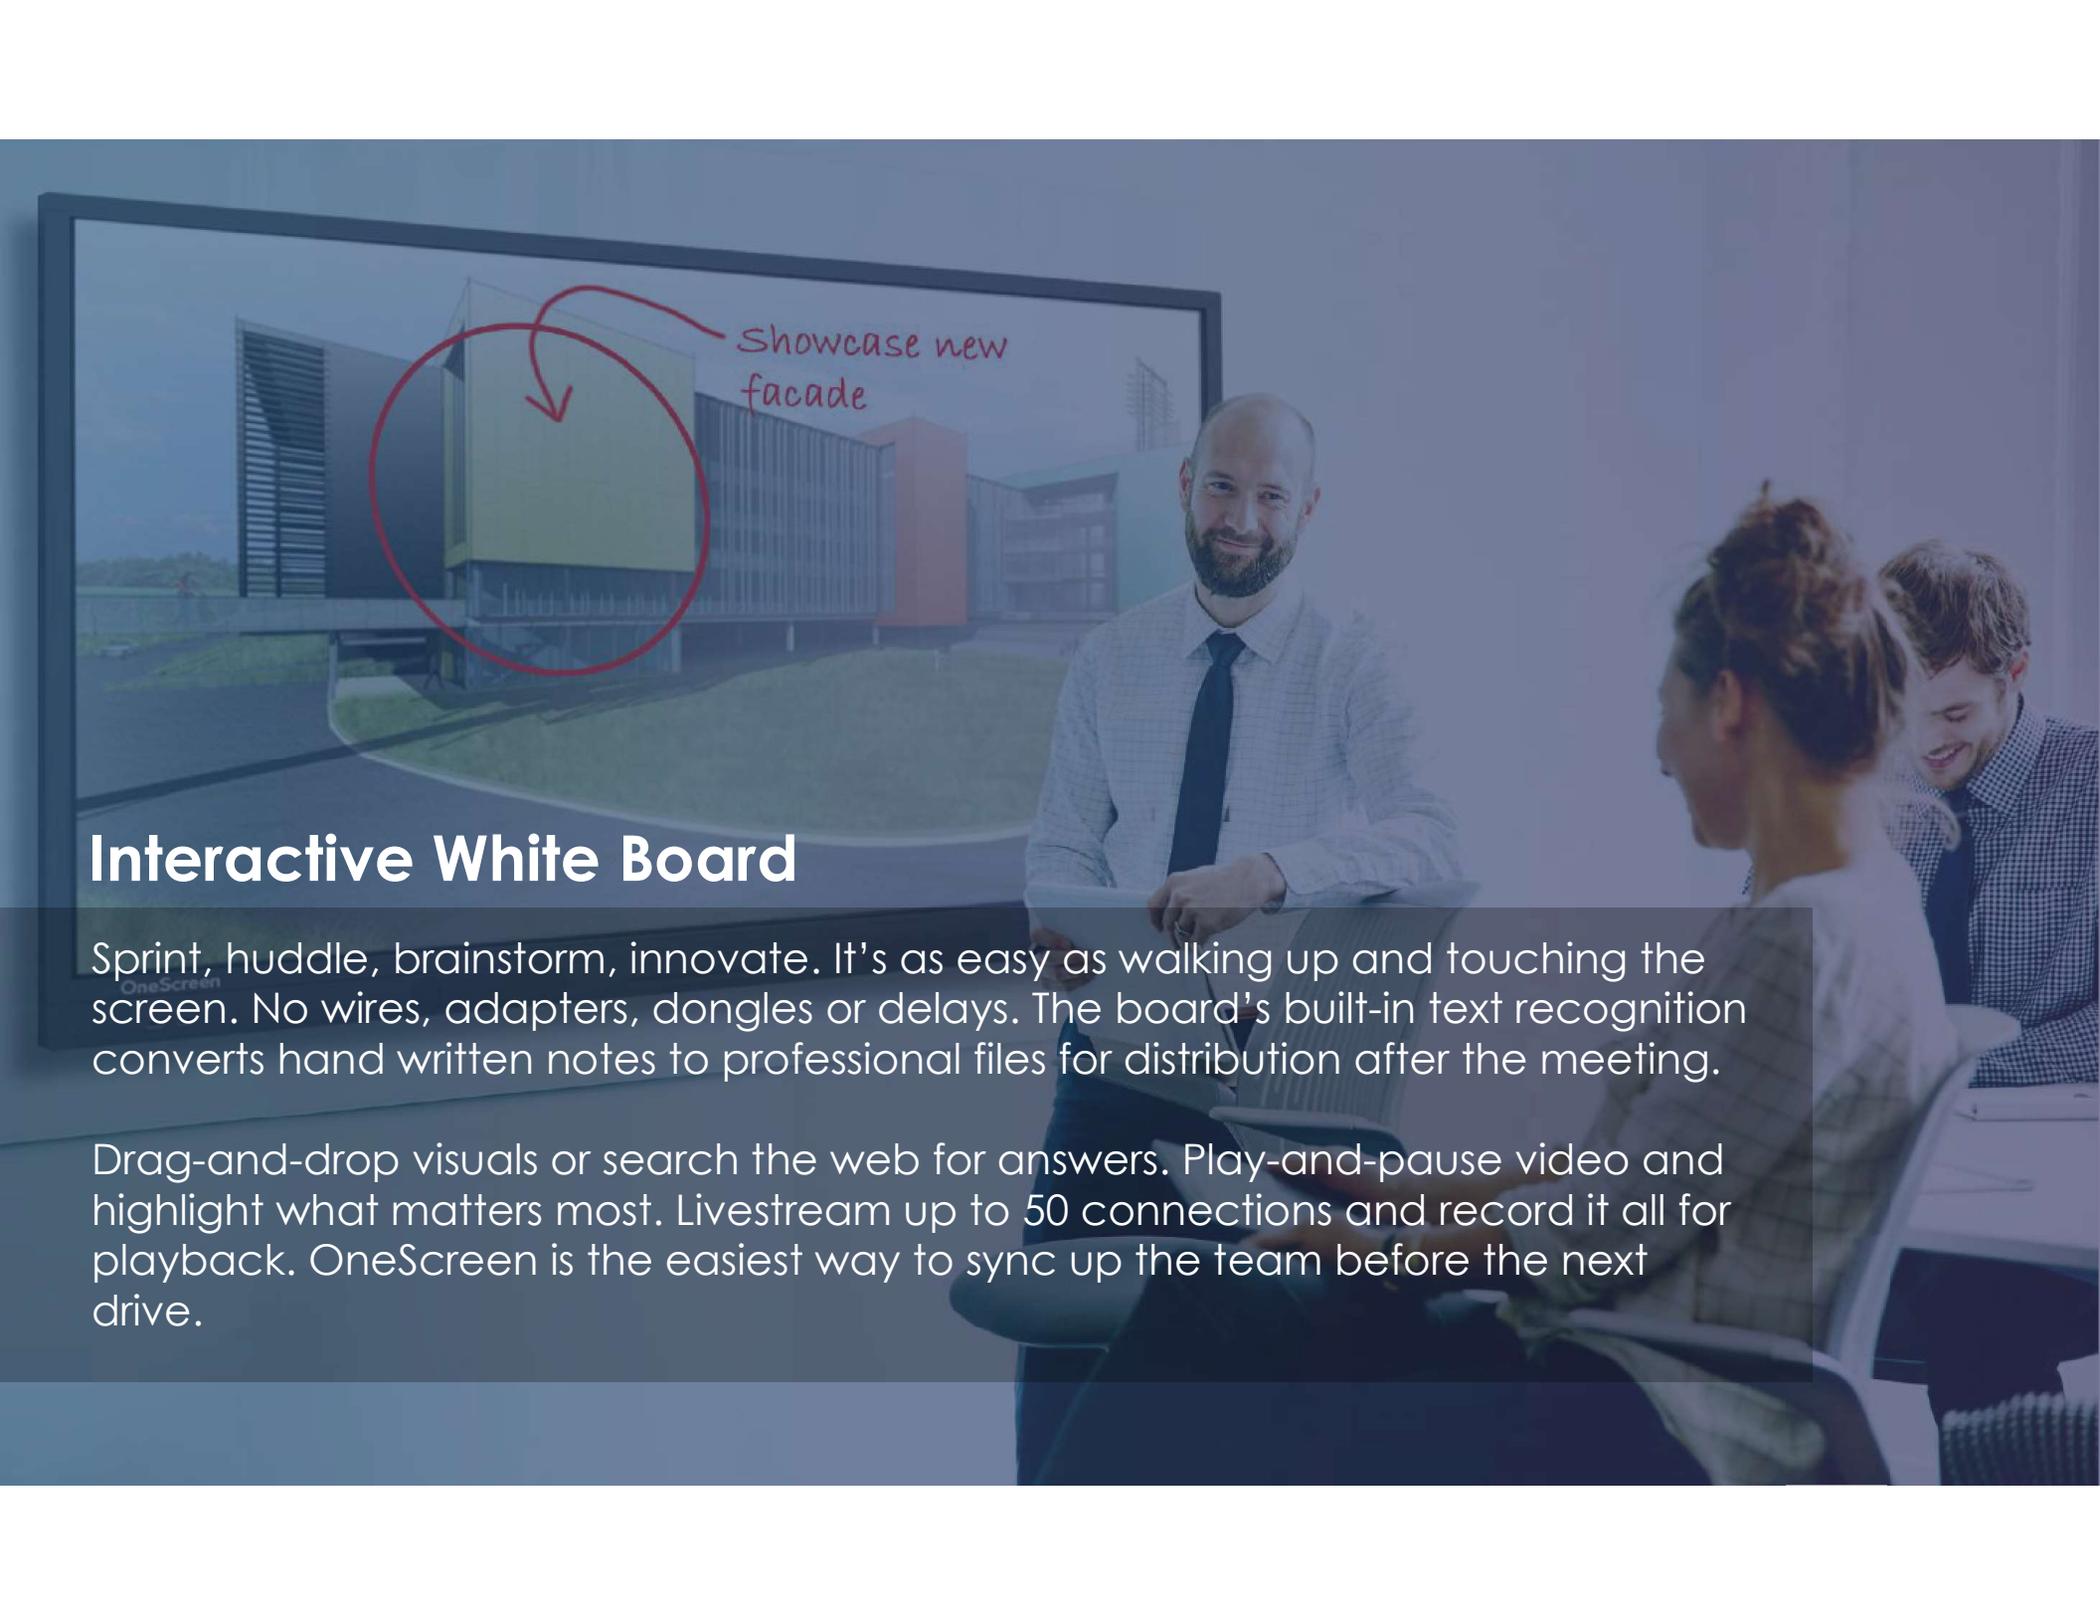

Unlimited, free Screen Skills Guru support and training with all of our solutions via audio, video, chat, email or phone.

A Video Conferencing & Collaboration Solution

OneScreen interactive smart screen is the central meeting point for all work flows. Give your team the freedom to work anywhere, any time, on any platform and in any environment that makes sense for them.

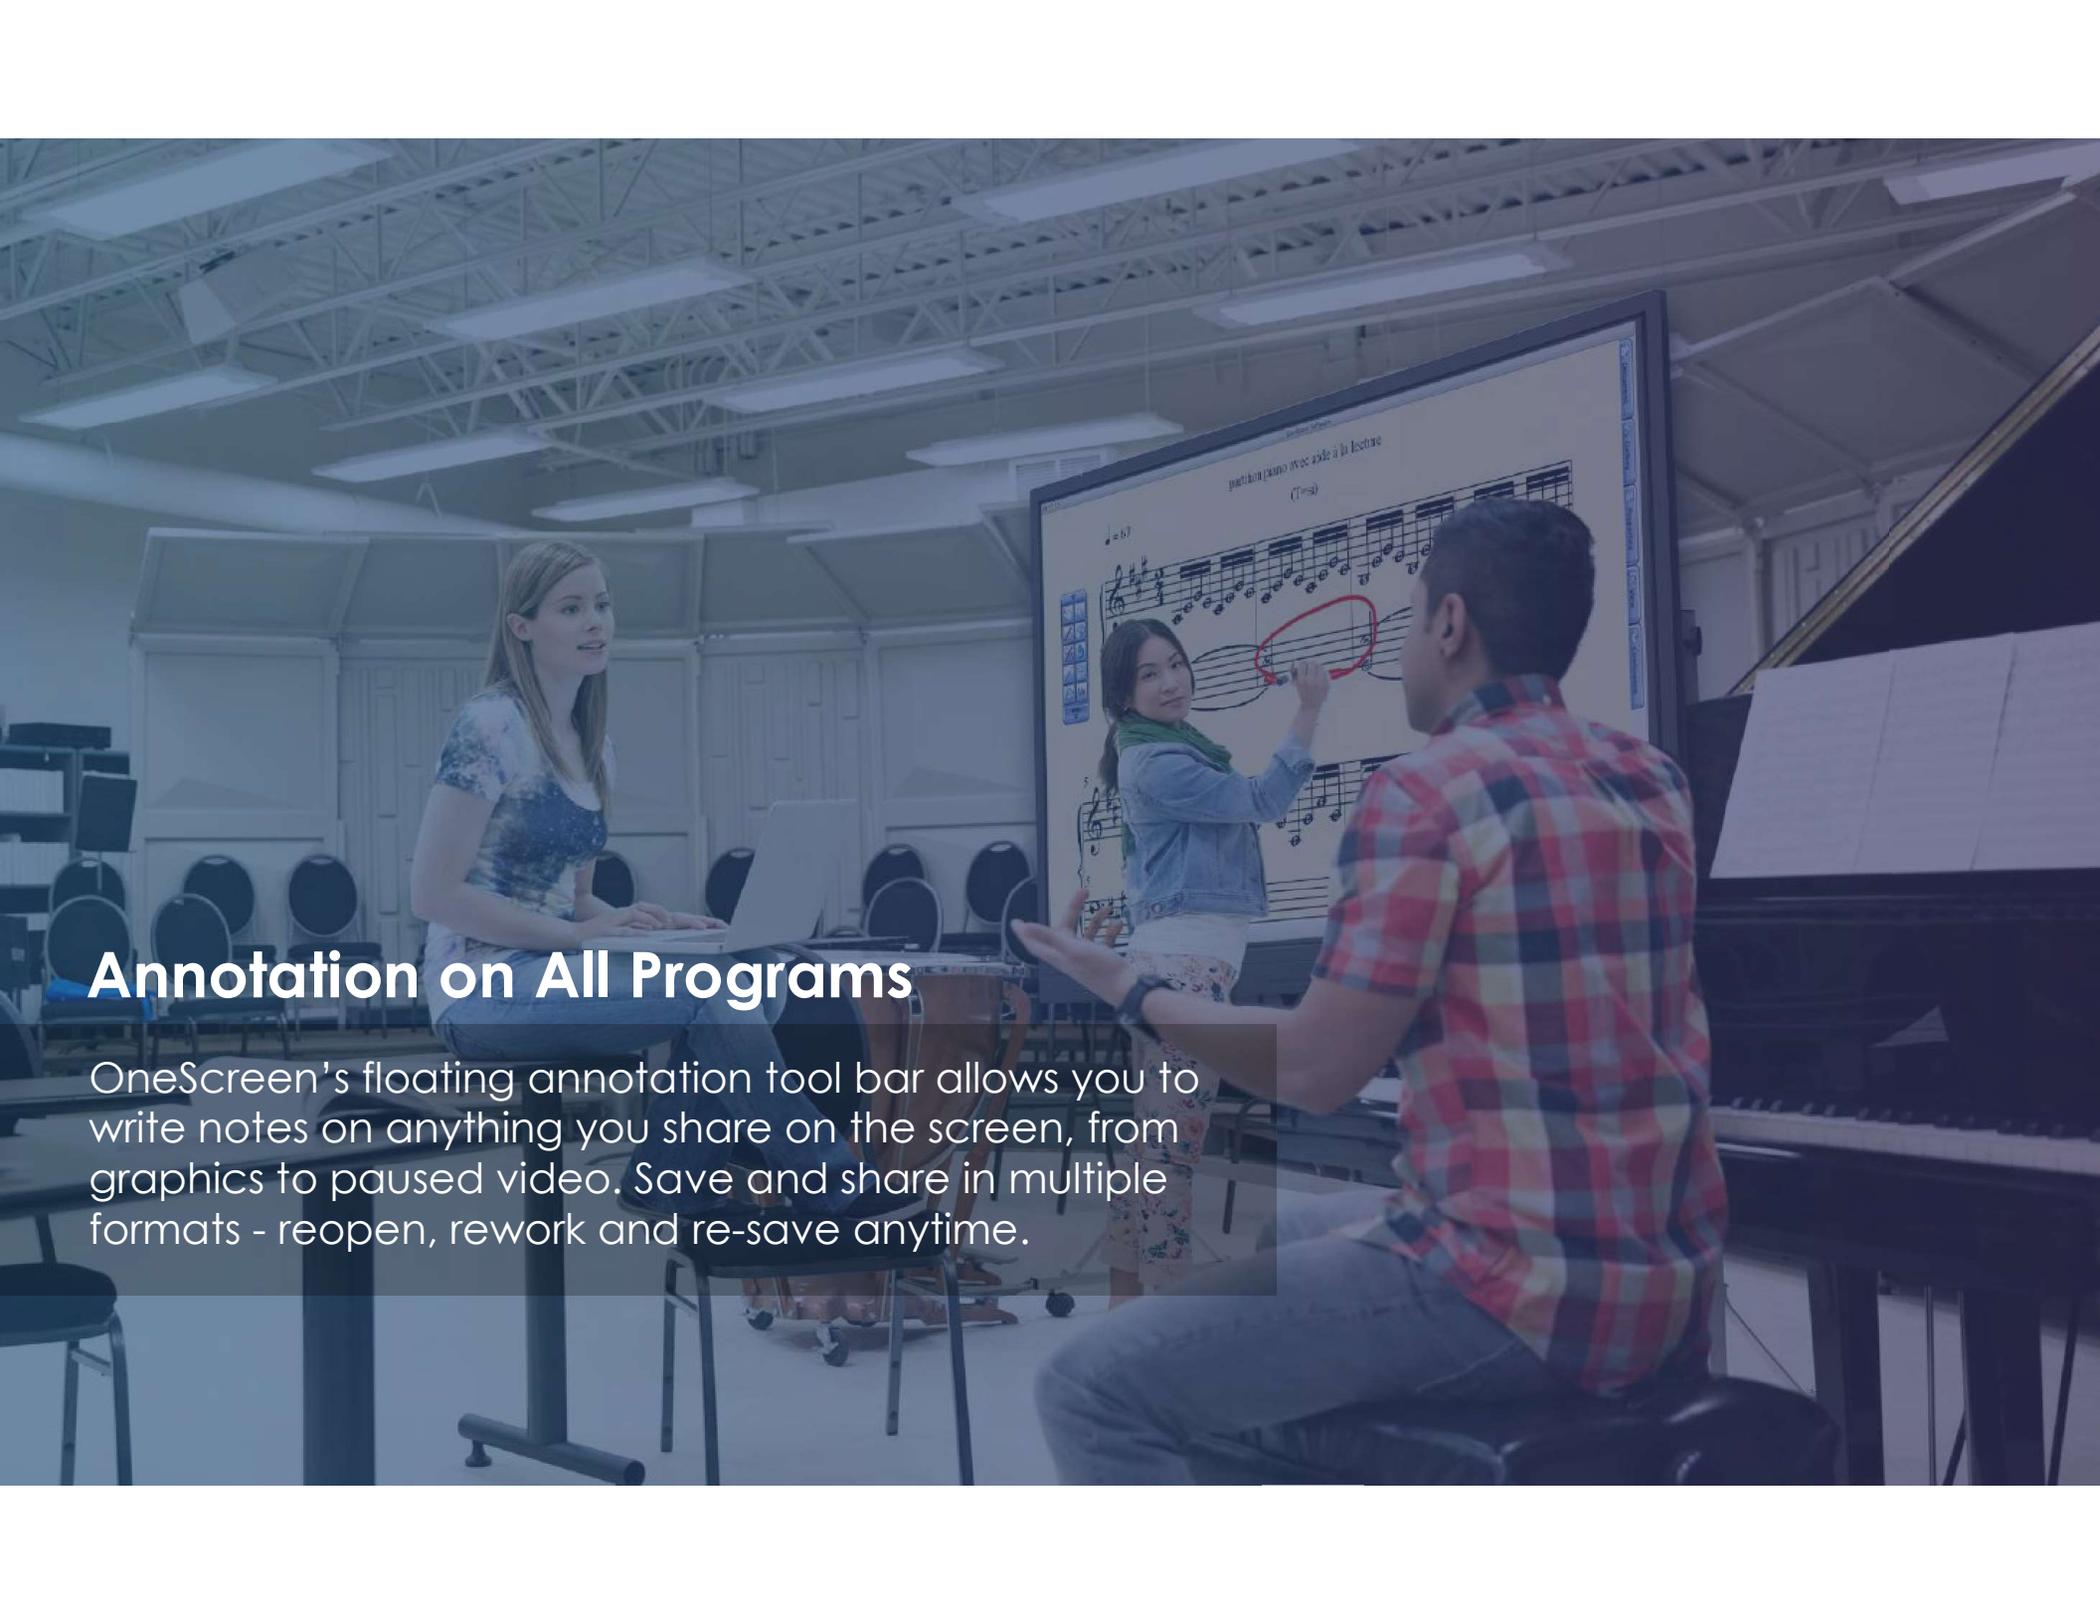

Don't delay critical decisions. Bring in the people you need from wherever they are, just in time to fix the problem or close the deal. Access all the data, visualizations, and integrated software it takes to get the job done.

Interactive White Board

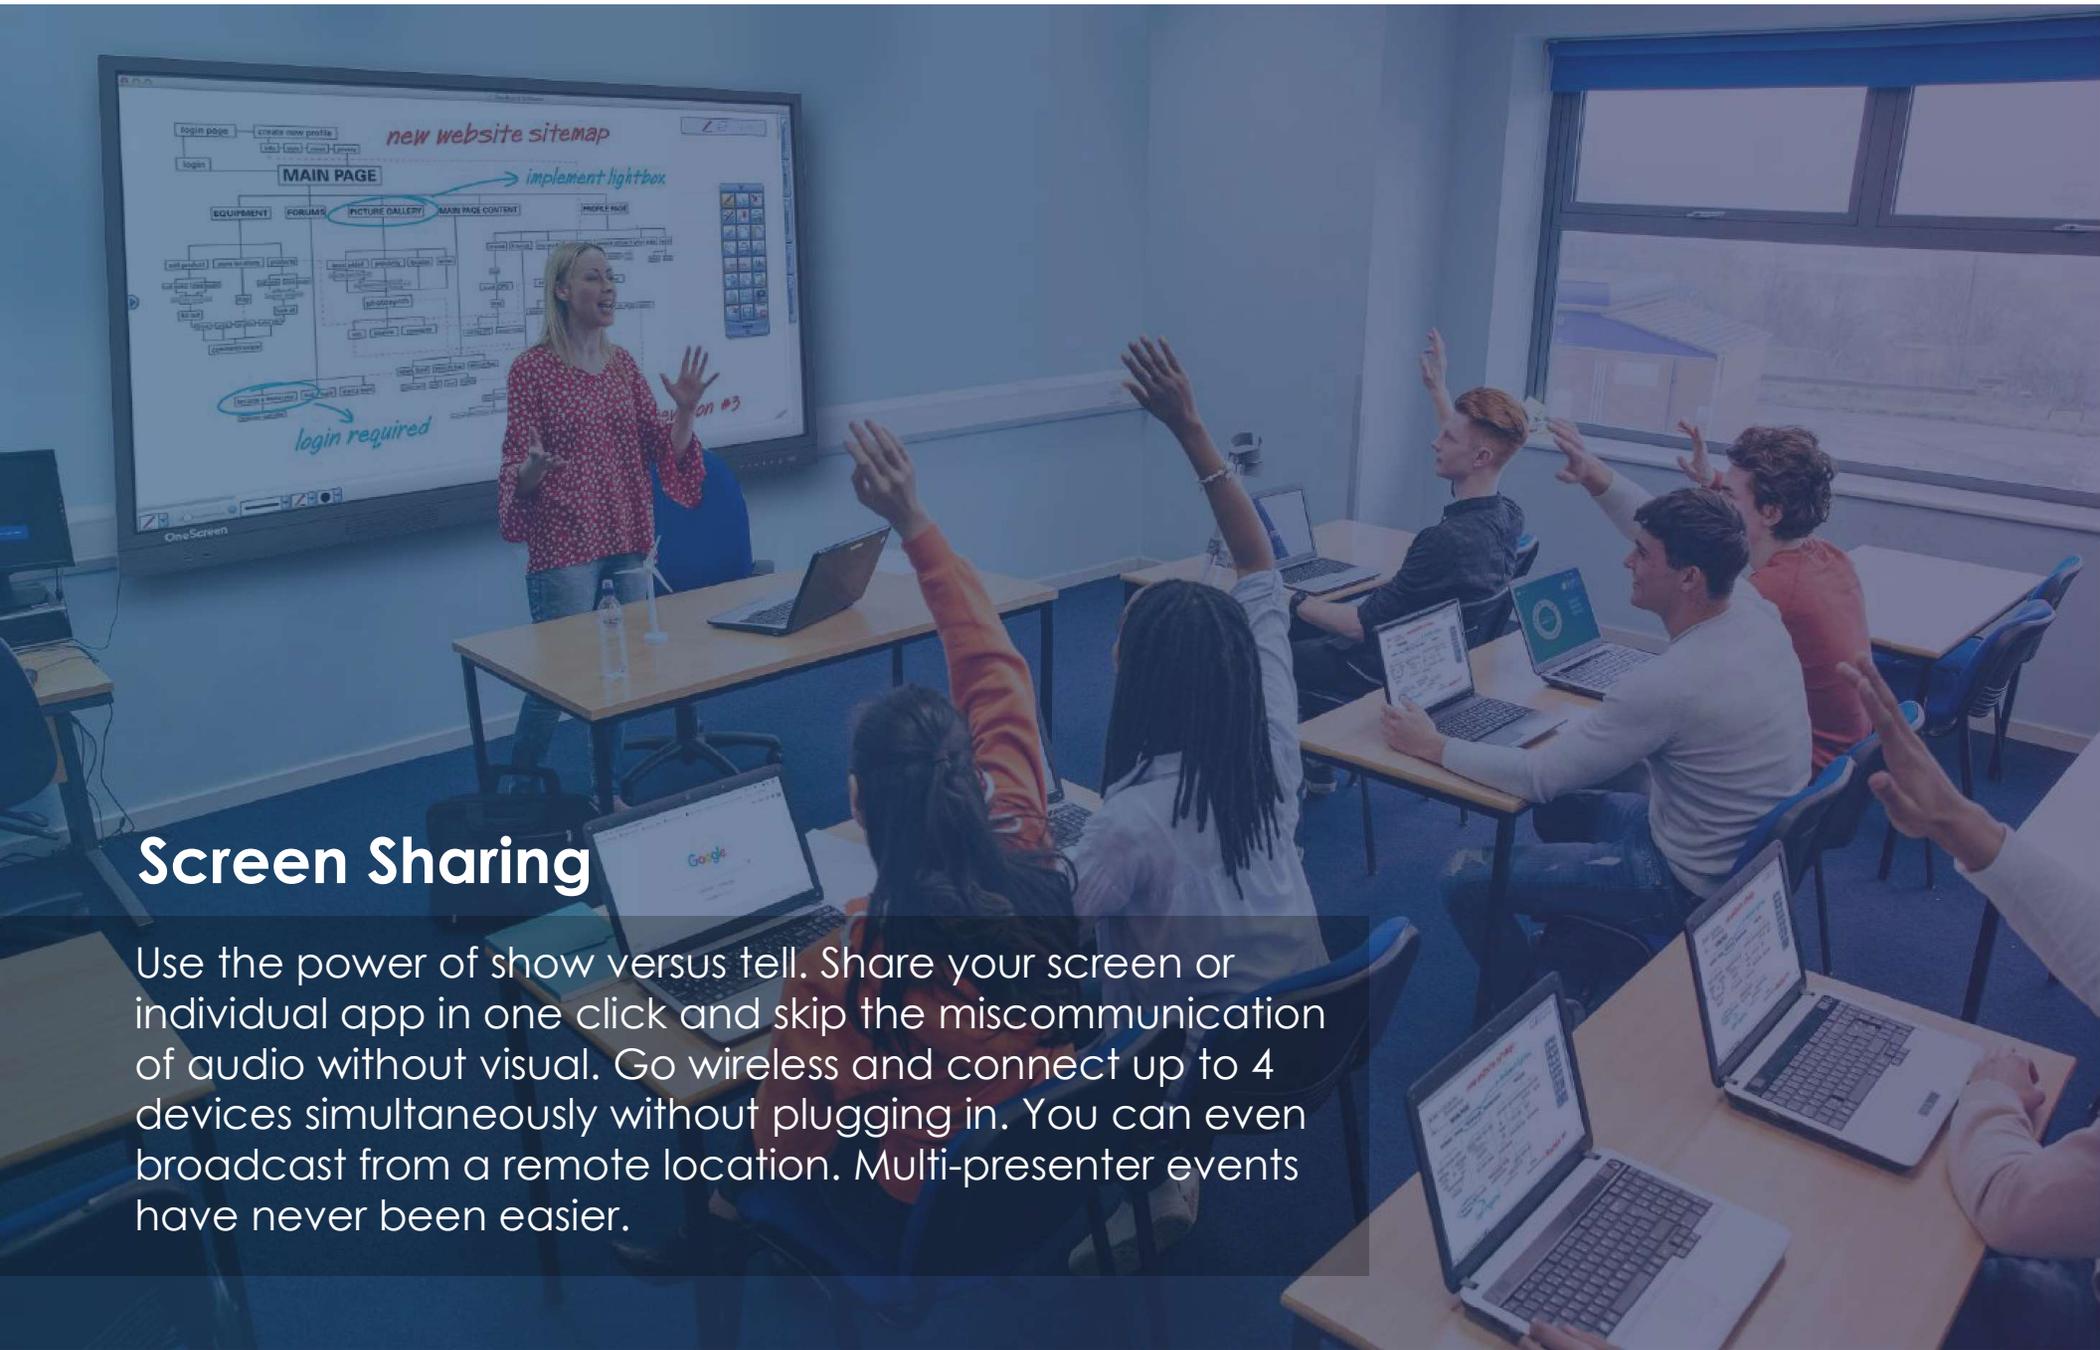

Sprint, huddle, brainstorm, innovate. It's as easy as walking up and touching the screen. No wires, adapters, dongles or delays. The board's built-in text recognition converts hand written notes to professional files for distribution after the meeting.

Drag-and-drop visuals or search the web for answers. Play-and-pause video and highlight what matters most. Livestream up to 50 connections and record it all for playback. OneScreen is the easiest way to sync up the team before the next drive.

A woman in a classroom is pointing at a large digital screen displaying musical notation. A man is sitting in front of her, looking at the screen. The screen shows musical notation with a red circle around a specific note. The background is a classroom with a piano and other musical equipment.

Annotation on All Programs

OneScreen's floating annotation tool bar allows you to write notes on anything you share on the screen, from graphics to paused video. Save and share in multiple formats - reopen, rework and re-save anytime.

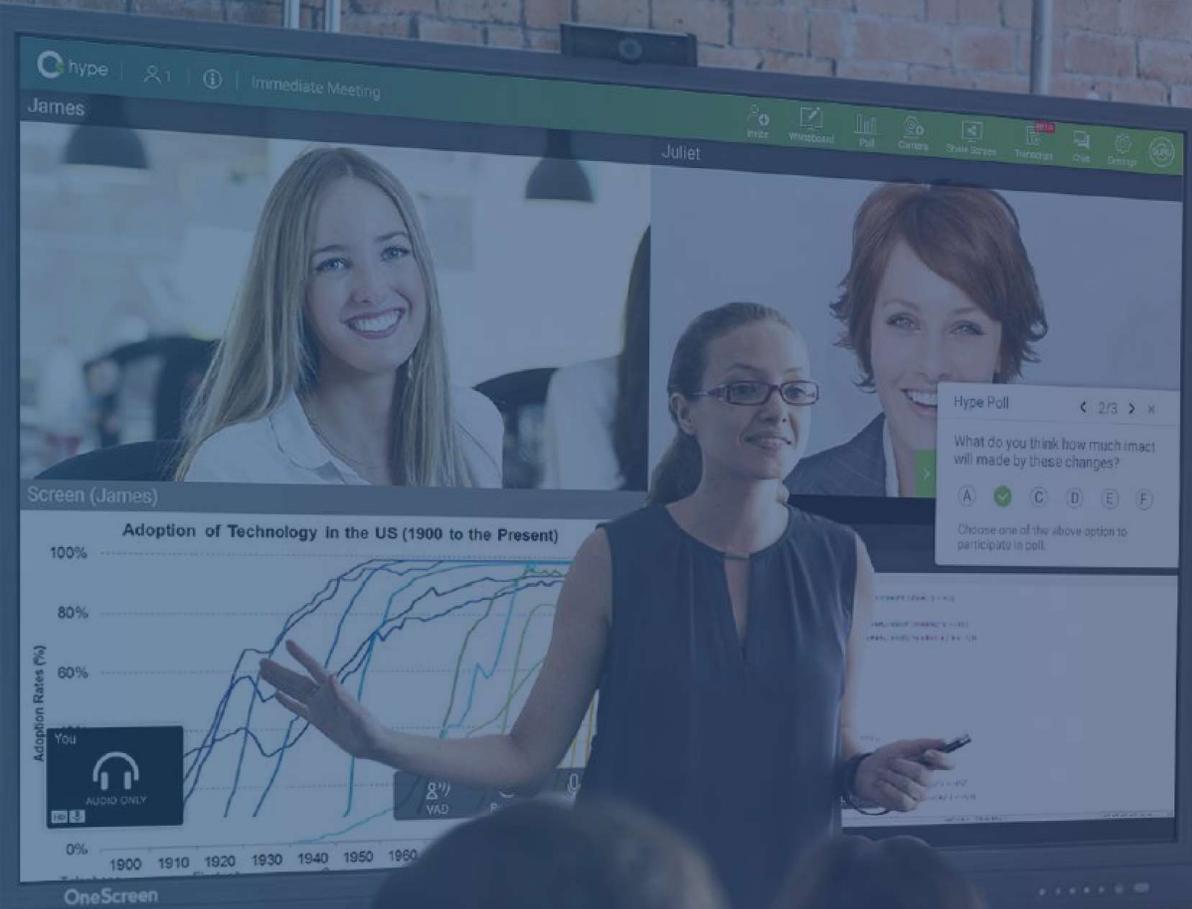

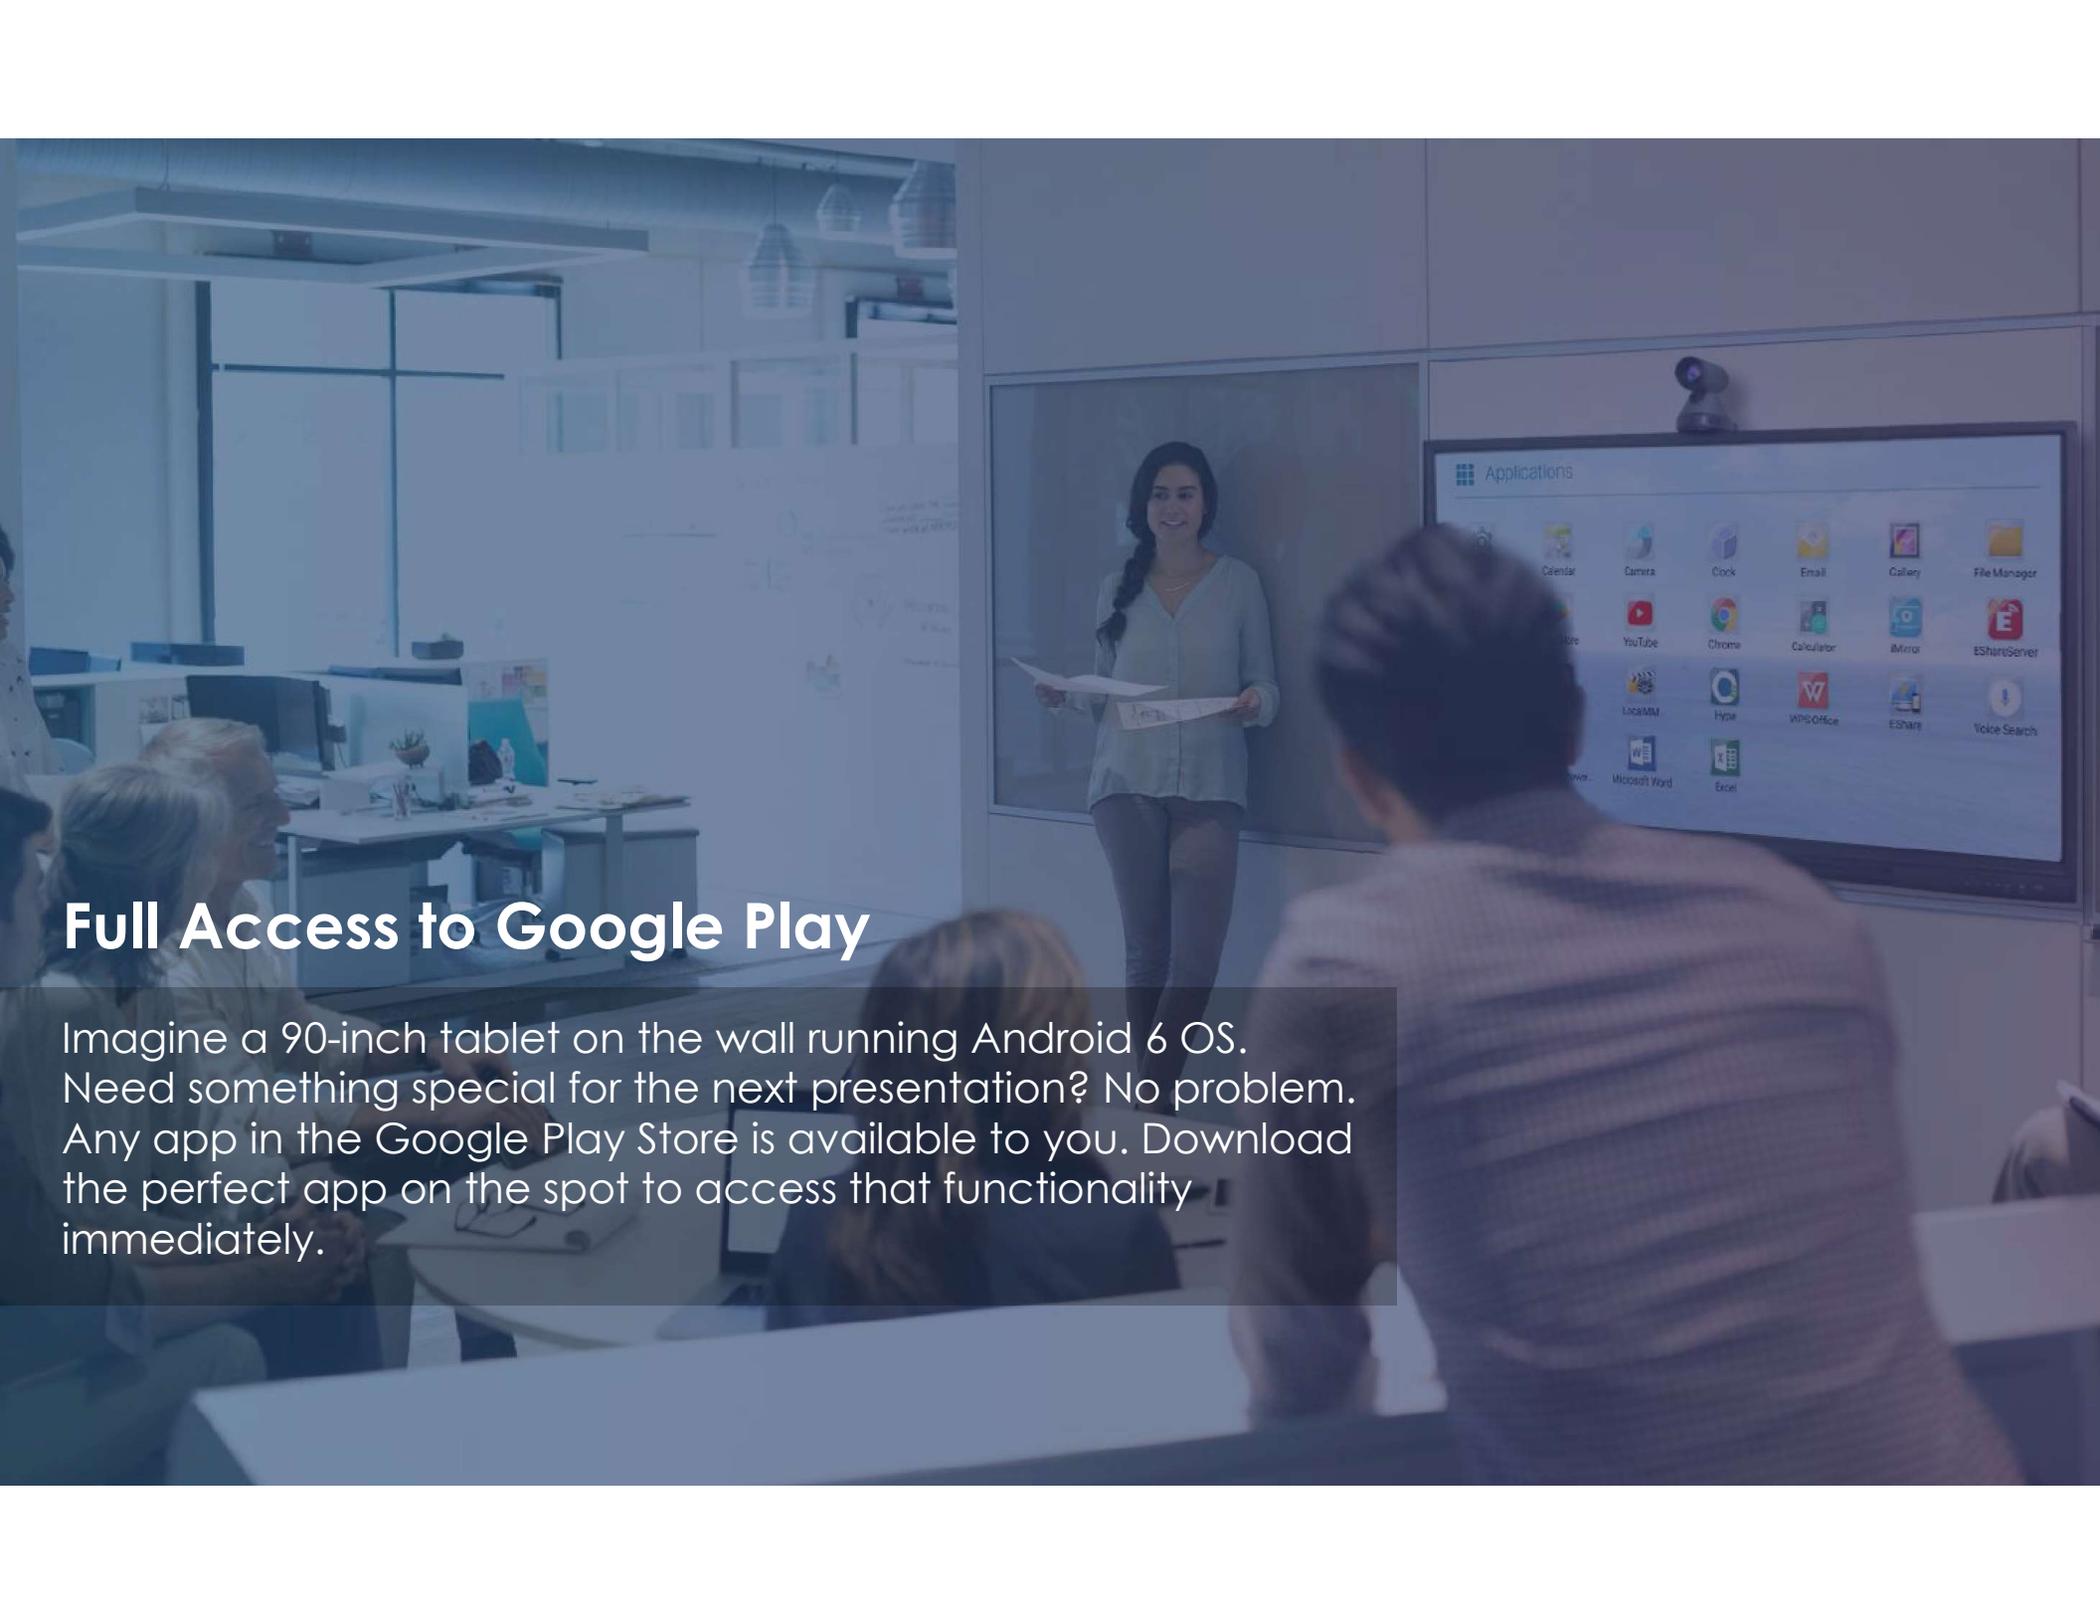

Screen Sharing

Use the power of show versus tell. Share your screen or individual app in one click and skip the miscommunication of audio without visual. Go wireless and connect up to 4 devices simultaneously without plugging in. You can even broadcast from a remote location. Multi-presenter events have never been easier.

Polling and Reporting

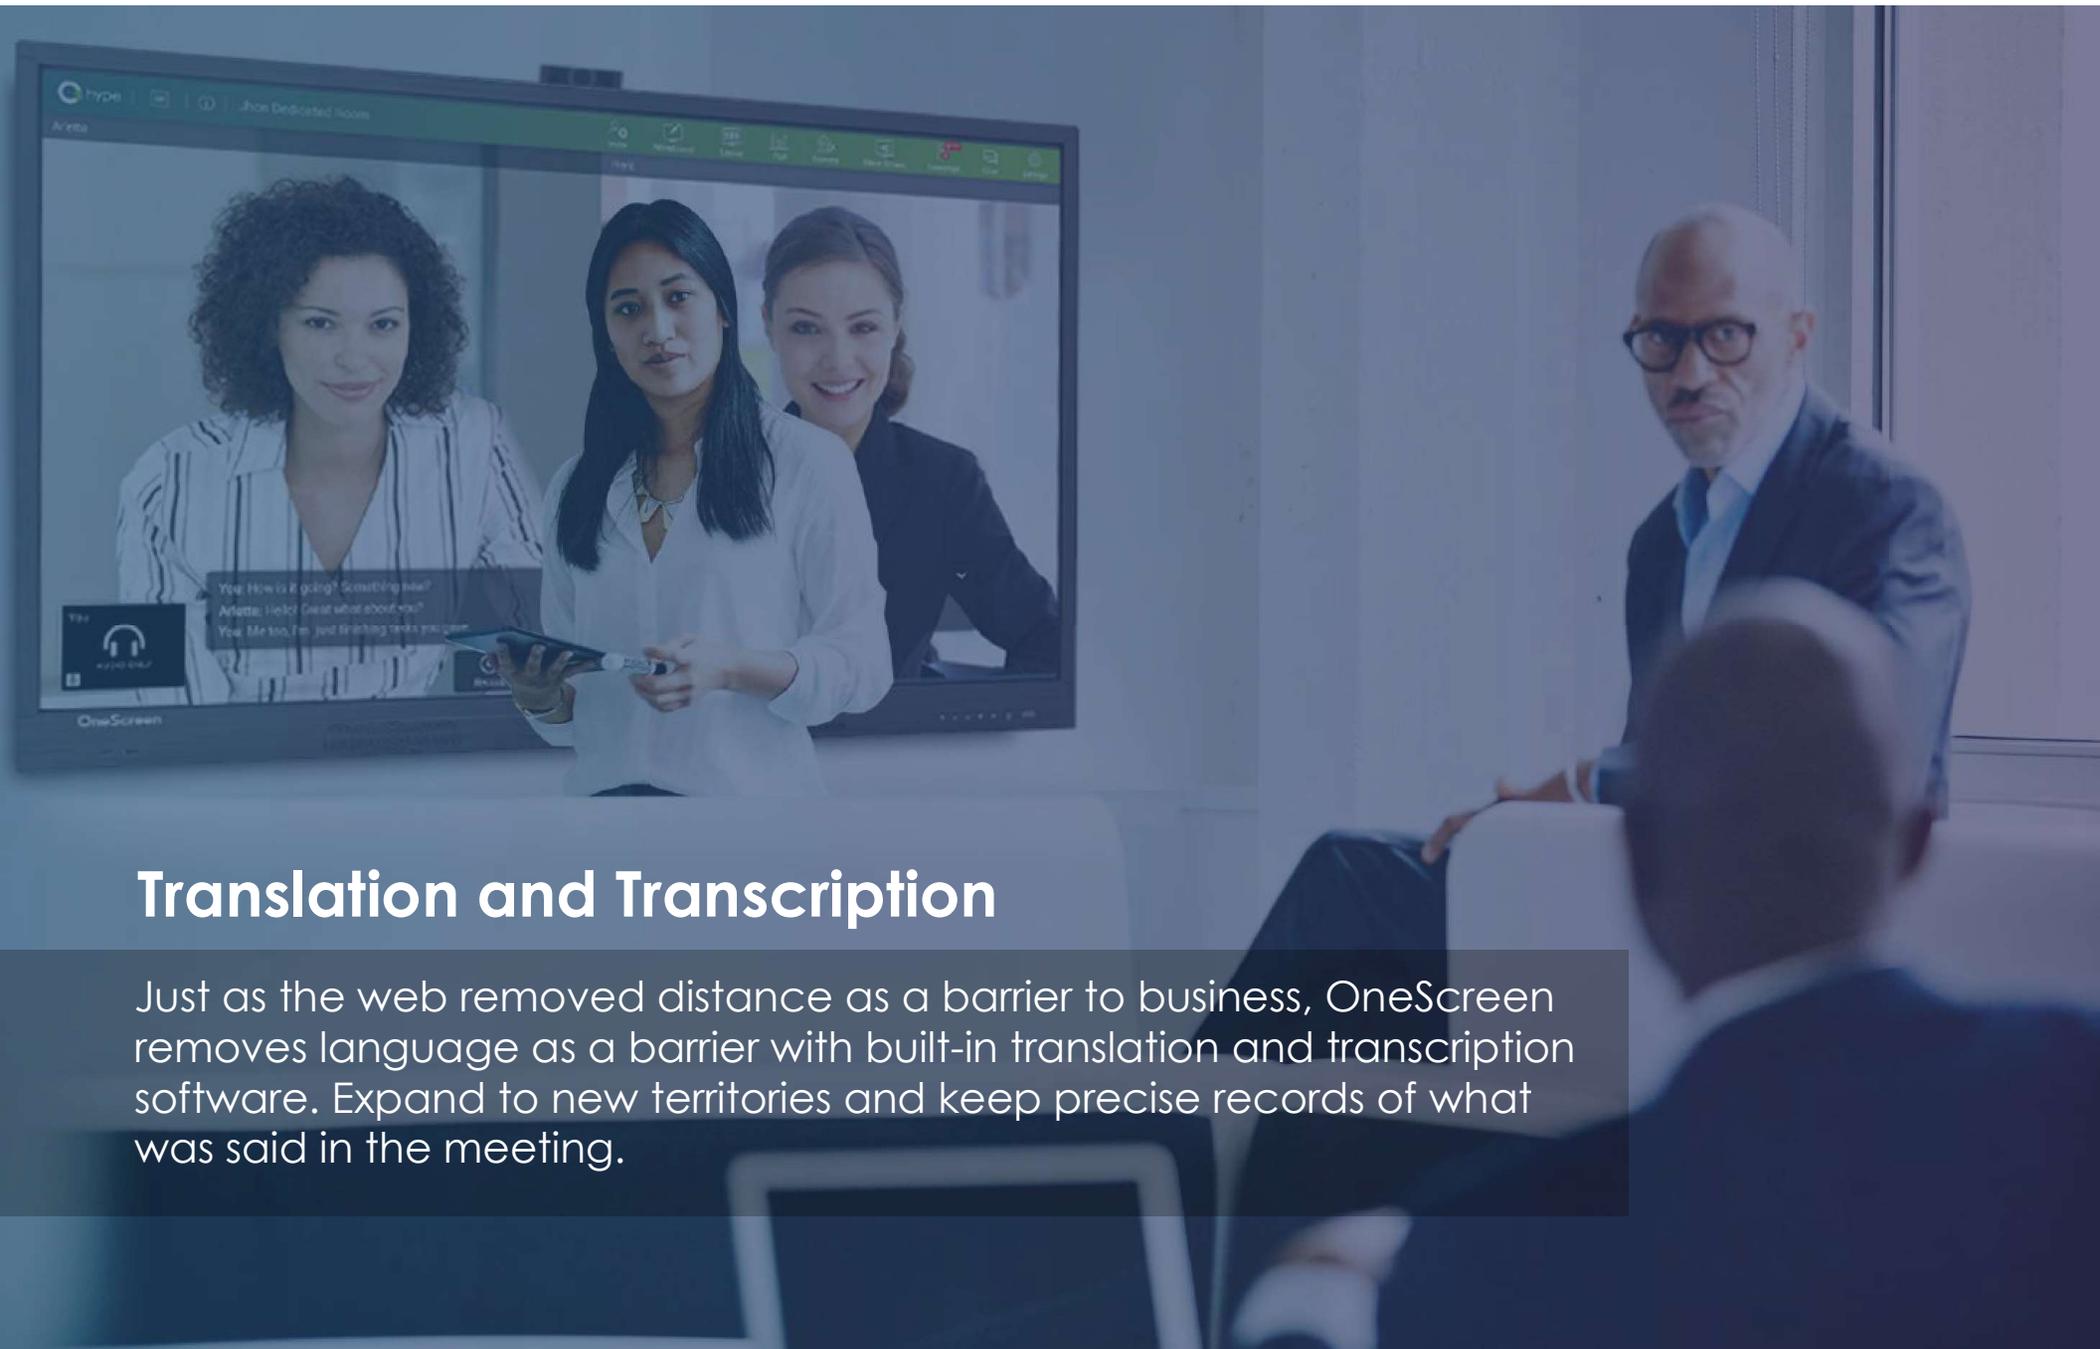

Gain consensus with polls and on-screen results. Create quick survey questions in real time for easy one-click answer or upload survey before the meeting. Build reports and share them with the team in a range of formats.

A woman in a light blue blouse stands in a meeting room, holding papers. Behind her is a large wall-mounted tablet displaying an Android application drawer with various icons like Calendar, Camera, Cook, Email, Gallery, File Manager, etc. The room has a whiteboard and desks with computers.

Full Access to Google Play

Imagine a 90-inch tablet on the wall running Android 6 OS. Need something special for the next presentation? No problem. Any app in the Google Play Store is available to you. Download the perfect app on the spot to access that functionality immediately.

Translation and Transcription

Just as the web removed distance as a barrier to business, OneScreen removes language as a barrier with built-in translation and transcription software. Expand to new territories and keep precise records of what was said in the meeting.

Free, Live, Unlimited Help from a Screen Skills Guru

Meet Shaun, one of our Screen Skills Gurus.

Shaun got his first computer when he was 4 years old, and believes that he might have always been a technology guru.

On top of his bucket list is to travel to Antarctica and experience a terrific adventure.

Build Your Perfect OneScreen

One size does not fit all. Customize your collaboration hub and watch your personal OneScreen maximize productivity and performance.

Do you need to capture everything that happens inside a large conference room? We can deliver high-gain microphones and a 1080p full HD camera, with a 12x optical zoom and a rotation range of up to 170°.

Are you simply looking for a smart screen to bring a small team together? All you need is flat panel with a simple webcam and a built-in microphone array with 3D noise reduction.

We're ready to build the perfect screen to turbo-charge your business.

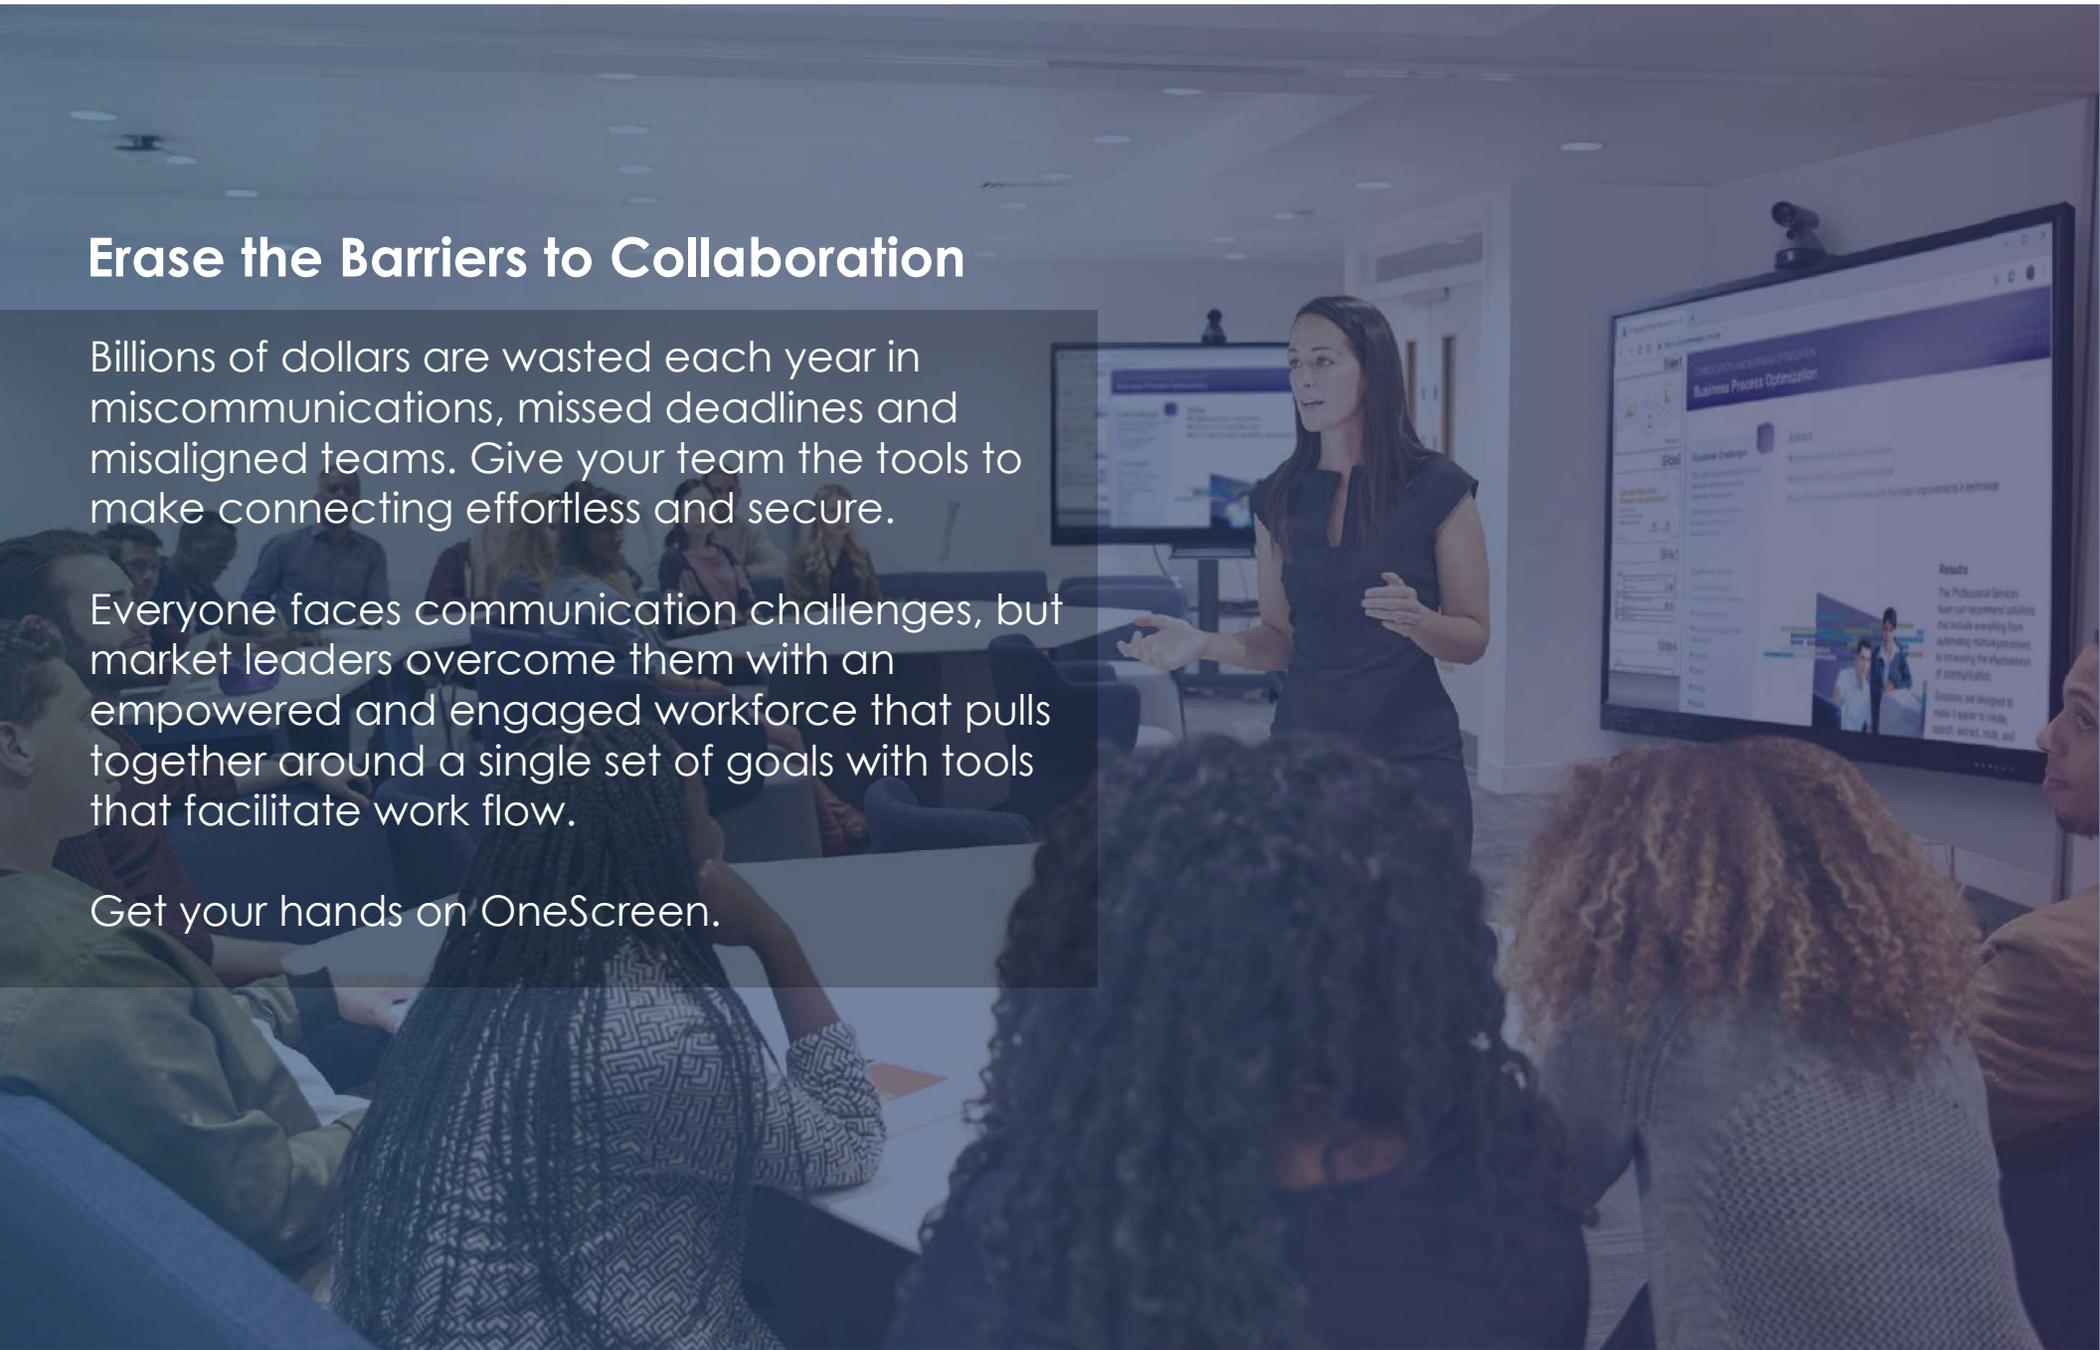

Erase the Barriers to Collaboration

Billions of dollars are wasted each year in miscommunications, missed deadlines and misaligned teams. Give your team the tools to make connecting effortless and secure.

Everyone faces communication challenges, but market leaders overcome them with an empowered and engaged workforce that pulls together around a single set of goals with tools that facilitate work flow.

Get your hands on OneScreen.

Sample of Specifications for Hubware 86"

Hardware	
Model Sizes	55", 65", 75", 86", 98"
OPS PC	Intel i7 4th Gen, 8GB RAM, 256 GB SSD, Gigabit Ethernet, WiFi 802.11 a/b/g/n, Bluetooth, Win 10 Pro
OPS Inputs/Outputs	4x USB 3.0, 2x USB 2.0, 1x HDMI, 1x Display Port, 1x VGA, 1x Mic, 1x Earphone, 1x RS232
OneScreen Webcam	1080p full HD USB 2.0 camera and mic, built-in microphone array with 3D noise reduction, wide-angle FOV 120°
Wireless Keyboard, Mouse	Full size Logitech wireless keyboard with touchpad, 33 ft. wireless range

Software & Services
