Giving Shape to Ideas

SMART + SEAMLESS

With an updated clear, logical interface and flexible customization options that adapts to user's needs, the improved i-Series range is very easy-to-use to boost productivity with an intuitive user-experience.

The enhanced user interface has been inspired by the look and feel of a smartphone. The device is intuitive to operate and offers users the choice between a basic or classic interface style. The control panel can be easily customized to meet customer requirements and can be personalized for individual users.

Easy operation thanks to user-friendly setup

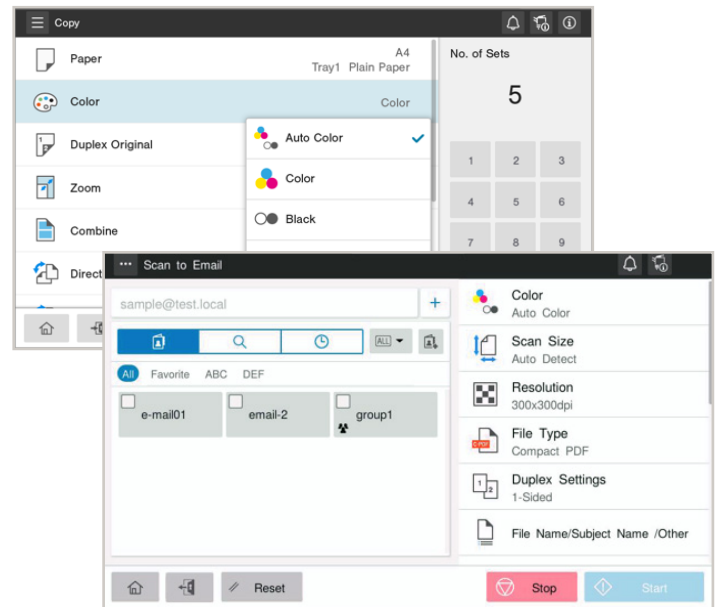

The 10.1 inch screen offers vibration feedback and a 90° tilt angle. Users can flick, scroll, enlarge and group the apps together just like on a smartphone or tablet.

Simple, sleek design

2D, intuitive icons make functions and settings easy to find and straightforward to use.

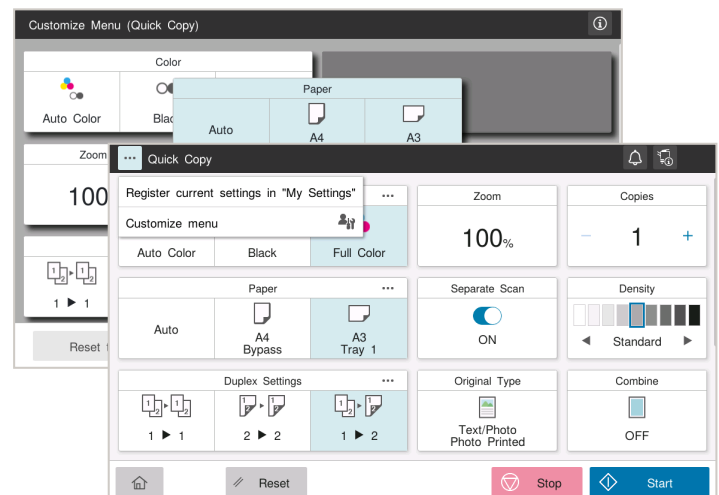

Easy access to settings

The user's most frequently used settings are visible at a glance and can be selected with just one click, or from the drop down or pop-up menu.

Quick Copy

The customizable Quick Copy mode card type offers an overview of all of the main settings at a glance and can be used to apply these settings quickly and easily. The desired settings can be selected in seconds, with significantly fewer clicks and pop-ups. Frequently used setting selections can be saved in the list "My settings" and easily recalled whenever the user needs them.

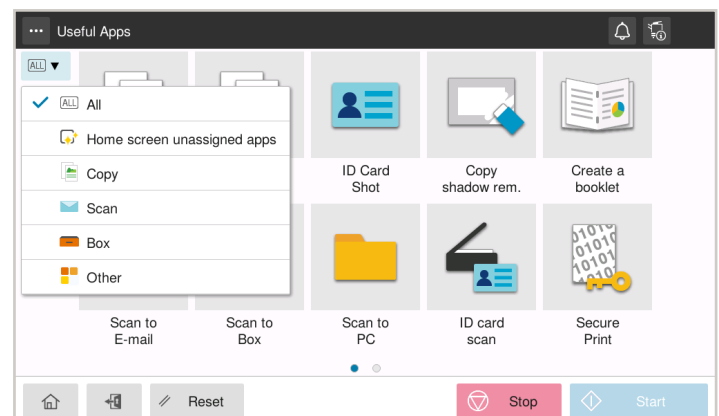

Helpful functions are pre-installed as standard

Valuable functions, guided messages and useful apps make operations significantly more convenient for customers.

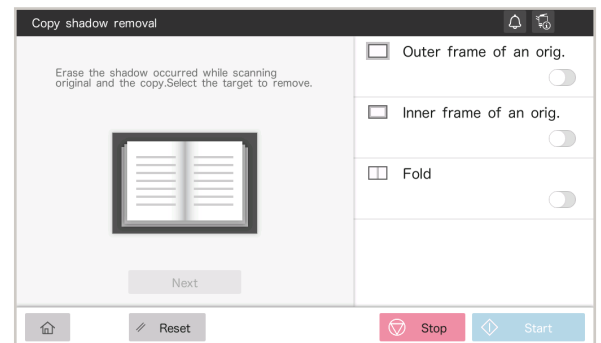

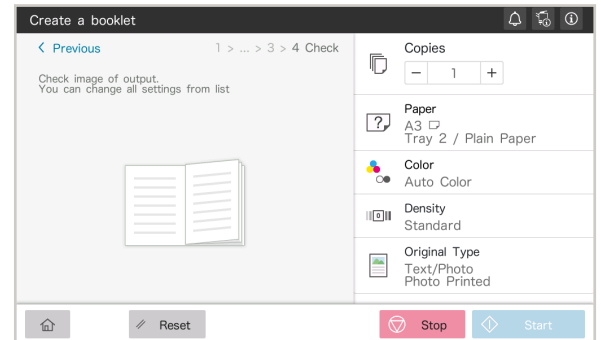

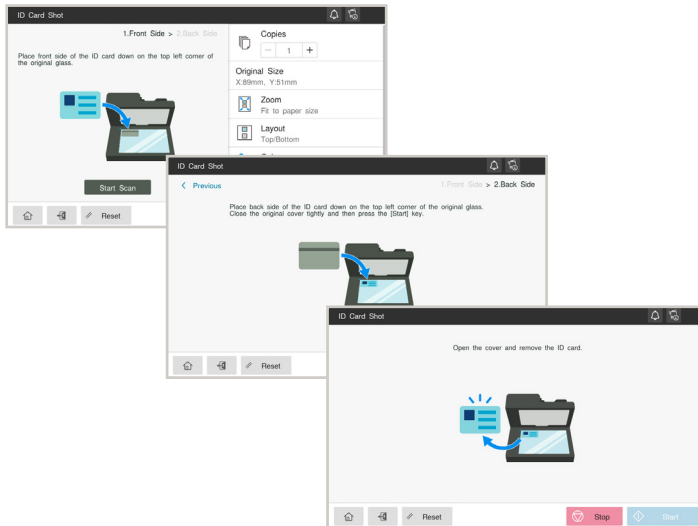

For example:

- Scan to Me (in one click)
- ID Card Shot (guided ID card copy)
- ID Card scan (guided ID card scan)
- Create a booklet (guided booklet copy)
- Copy shadow removal (edges and center)
- Secure Print Box (secure print direct access)

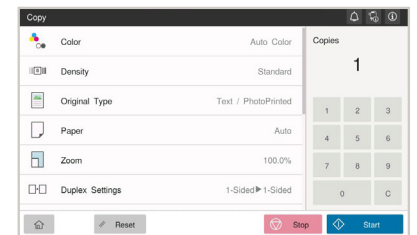

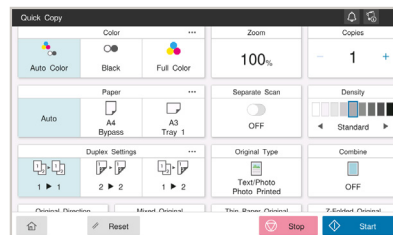

Purpose-oriented UI

The guided application flow uses graphics, text information and selection options to ensure the perfect job results, even when using difficult to understand functions.

Select your own UI style

Users are able to choose their favorite interface style for copying. Options include the Basic style, which can be used as a list-type or card-type interface, or the Classic style.

The **Basic Quick Copy card type** provides direct access to and straightforward selection of all frequently used settings from one screen, reducing the number of screens the user needs to click through to a minimum.

The **Basic line type** offers a simplified experience with easy and direct access to frequently used settings.

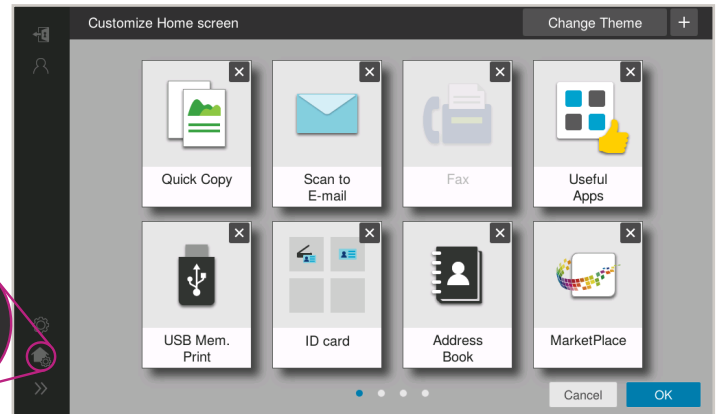

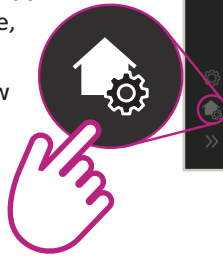

Classic is a similar UI to the previous bizhub generation.

The **Classic quick menu** offers direct access to all the settings from one screen.

Individual Home screen customization and personalization

The MFPs Home screen can be tailored to individual customer requirements. Though users can put popular functions and features on the Home screen while removing/hiding functions that are rarely or not used at all. Access to the setting is protected by administrator password. With the Personalize App available via Konica Minolta MarketPlace, the customization feature becomes a personalization feature: each user is now able to define which feature should be available, so that the device can be adopted to the individual working behavior without harming the user experience of different users.

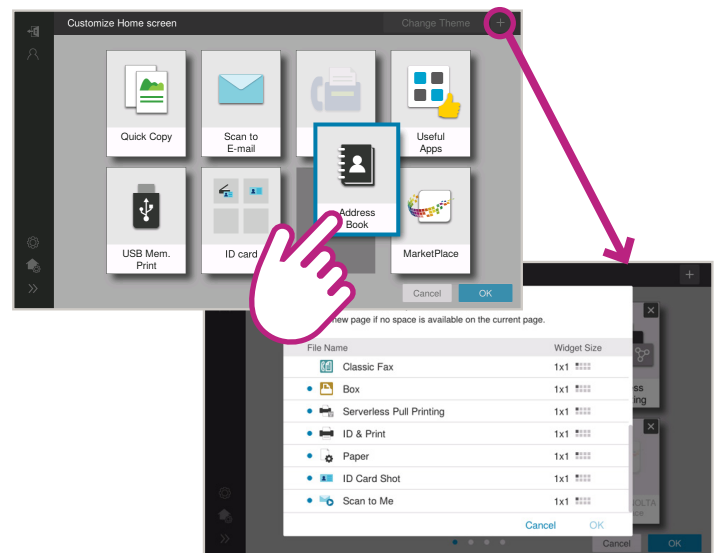

Easy Home screen customization

New apps grouping feature allows easy structuring and organization of the apps in folders.

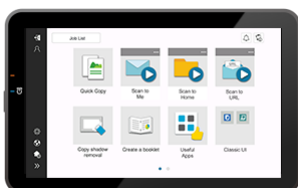

Admins or Users with the Personalize App available via Konica Minolta MarketPlace can rearrange the icons/functions by pressing and holding on an icon and dragging and dropping it into a different position.

Icons/functions from the function list can also be added and removed to meet individual customer and user requirements.

Example of customized Home screens

Administrators, Users (with Personalize App) can customize the Home screen to ensure the ideal layout for their individual way of working. At the touch of a button, all individual selected settings are transferred to MarketPlace and a "Follow-me" panel is created, which enables users to access the personalized display from any device.

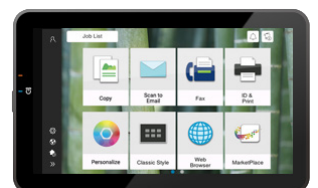

Standard background plus standard and additional apps. All apps can be placed individually

Inverted background and app colors

Company-specific background image (can be customized with company logo, etc.)

Personalized Background image with access to user-defined apps and functions

UPGRADE WITH ADDITIONAL FEATURES

Our pre-installed app and service store lets customer find and download apps, widgets and connectors – including third-party authentication apps and connectors to cloud repositories – straight from their bizhub office device.

And the best: our comprehensive security solutions will keep customer's business protected by using Marketplace.

Powerful cloud connectivity

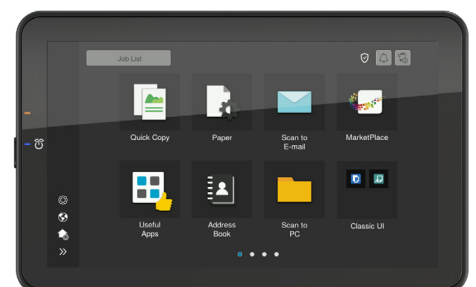

Users simply connect their office printer to popular cloud services like SharePoint Online, OneDrive, Google Drive or Dropbox for basic file/folder operations, scanning to cloud storages and selecting files for printing – directly from the printer panel.

Visible security

Our customers can rest assured that their office devices are handling secure files and are always protected from potential security threats. So they can stay safe and monitor their security settings with Secure Notifier – visible directly on the device's control panel.

 **MarketPlace**

Widgets – Application functions directly accessible from the home screen

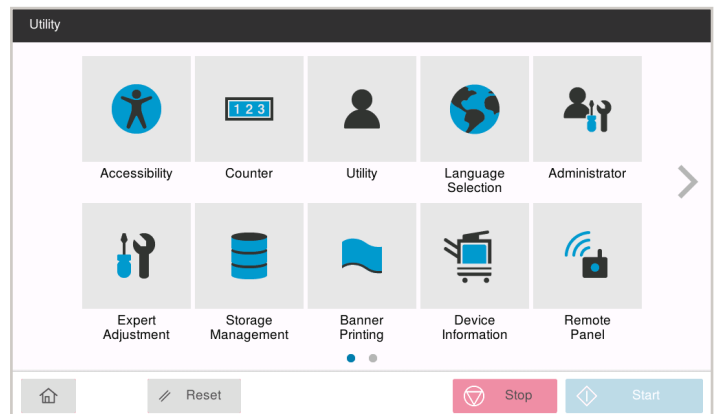

MarketPlace is the place to go for MFP widgets. These widgets enable users to operate applications straight from the home screen without even having to start them.

The bizhub Secure Widget indicates the security status for the user operating the device.

A consistent experience for administrators

Thanks to its modern interface, the utility menu offers all administrators the same straightforward user experience.

QUICK REFERENCE GUIDES

Instructions for operating the individual user interface models are available for you to download from our Reference KMBS Public Download site:
